

OLOWU ABRAHAM ADURAGBEMI

Data Scientist & Data Analyst

Lagos, Nigeria | +234-916-036-6834 | olowu.tayo200@gmail.com | linkedin.com/in/erioluwa | github.com/Ethminer001 | ethminer001.github.io

PROFESSIONAL SUMMARY

IBM-certified Data Scientist and machine learning practitioner with hands-on expertise in predictive modeling, customer analytics, and end-to-end ML pipelines across healthcare, telecom, and retail. Delivered **\$3.1M+ in projected revenue impact** through production-ready models achieving 84.2% ROC-AUC, risk-tier segmentation, and data-driven retention strategies. Core stack: Python (Pandas, Scikit-learn, XGBoost), SQL (PostgreSQL, MySQL), Tableau, Power BI, and Excel. Combines rigorous analytical thinking with business storytelling to convert complex data into decisions that protect revenue and accelerate growth.

SKILLS

Technical Skills

Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, XGBoost), R, SQL (PostgreSQL, MySQL, SQLite — CTEs, Window Functions, Complex Joins), Git/GitHub, Jupyter Notebooks, Streamlit

Machine Learning & Statistics

Random Forest, XGBoost, Logistic Regression, SMOTE, Hyperparameter Tuning, Feature Engineering, SHAP, Model Evaluation (ROC-AUC, Precision, Recall, F1), Hypothesis Testing, A/B Testing, Regression Analysis, Time-Series Forecasting

Software & Tools

Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Macros, VBA), Google BigQuery, Supabase, Google Analytics

Domain Knowledge

Churn Analysis, Customer Segmentation, Predictive Modeling, Revenue Optimisation, Data Cleaning & ETL, Database Design, Stakeholder Communication

DATA ANALYTICS PROJECTS

Patient Retention & No-Show Prediction — Healthcare Analytics

Python · SQL · Random Forest · XGBoost | 2024

- \$2.37M projected revenue recovery (2,149% ROI) by preventing 13,000+ annual no-shows through optimised scheduling and SMS interventions.
- 72% ROC-AUC ensemble model engineered on 110,527 medical appointment records using Random Forest and XGBoost.
- 62,299 patients segmented into risk tiers, enabling targeted outreach for high-risk cohorts — patients under 30 and 30+ day-advance bookings identified as primary no-show drivers.

Customer Churn Prediction — Telecom Analytics

Python · Scikit-learn · Random Forest · SMOTE · SHAP | 2024

- 84.2% ROC-AUC churn model (82% precision, 78% recall) built end-to-end for 7,043 telecom subscribers using Random Forest with SMOTE class balancing.
- \$1.73M annual revenue at risk quantified from 1,200 high-probability churners via risk-tier segmentation; month-to-month customers shown to churn at 5x the rate of annual contracts.
- 411% Year 1 ROI retention programme designed, projecting \$577K revenue protected and \$464K net benefit from targeted interventions.

Retail Sales Intelligence & Revenue Optimisation — Business Analytics

MySQL · Python (Pandas) · Matplotlib · Seaborn | 2024

- \$262K Year 1 net benefit (577% ROI) unlocked through BI analysis of 2,000 transactions (\$766K revenue) via 30+ complex SQL queries across revenue patterns, customer behaviour, and profitability.
- Electronics identified as driving 40.5% of revenue; two peak hours shown to generate 70% of daily sales — reshaping staffing and marketing allocation.
- VIP loyalty programme designed for top 50 customers (15% of revenue) with 18% staffing cost reduction recommendation.

Sales Performance Diagnostic & Recovery Strategy — Regional Analysis

SQL · Python (Pandas) · Statistical Analysis | 2024

- 15% quarterly revenue decline diagnosed through multi-dimensional analysis across regional, product, and customer segment dimensions.
- South region pinpointed as primary driver (23% drop, \$47K loss); three targeted recovery interventions recommended including reactivation campaign for 340 lapsed customers (\$15K projected 60-day lift).

WORK EXPERIENCE

Data Analytics Consultant (National Service)

Government Technical College, Osogbo, Nigeria | January 2025 – December 2025

- 15% increase in class average achieved by analysing performance data for 120+ students using Excel and statistical methods to identify learning gaps and deploy targeted interventions.
- Analytical tracking system designed covering attendance, assessments, and 15+ performance indicators — enabling early intervention for at-risk students.
- Regression analysis applied to forecast student outcomes and optimise resource allocation across curriculum delivery.

Digital Community Growth Analyst

Online Gaming & Digital Asset Platforms (Remote), United States | January 2022 – January 2023

- 25% increase in active participation driven across two digital communities (71,500+ members) through behavioural analytics and data-informed growth campaigns.
- Centralised KPI dashboard built in Google Analytics and Excel tracking DAU/MAU ratios, sentiment scores, retention rates, and 10+ engagement metrics.
- Multivariate A/B tests designed and executed across content type, timing, and format — statistical significance analysis used to identify winning variants.

Quality Assurance Analyst

Archy Pharmaceutical Company, Lagos, Nigeria | June 2021 – October 2021

- 100% GMP compliance maintained across 200+ batch tests through statistical process control and pharmaceutical manufacturing data analysis.
- Control charts and trend visualisations developed to detect variation patterns early, enabling proactive quality interventions.

Inventory Analyst & Demand Forecasting Specialist

Preplus Supermarket, Lagos, Nigeria | March 2020 – January 2021

- 30% reduction in stockouts and 15% improvement in inventory turnover delivered through time-series forecasting models achieving 92% accuracy.
- Monthly BI reporting automated via Excel macros, eliminating manual reporting cycles and improving data accessibility for management.

EDUCATION

Bachelor of Science, Biochemistry

Federal University Oye Ekiti (FUOYE), Ekiti, Nigeria | August 2024

Relevant Coursework: Biostatistics, Research Methodology, Quantitative Analysis, Scientific Computing

CERTIFICATIONS

Supervised Machine Learning: Regression & Classification

Stanford University / DeepLearning.AI (Coursera) | March 2026

Deloitte Data Analytics Job Simulation (Tableau, Excel, Forensic Analytics)

Deloitte via Forage | February 2026

SQL and Relational Databases 101 (DB0101EN)

IBM Developer Skills Network | January 2026

Python 101 for Data Science (PY0101EN)

IBM Developer Skills Network | January 2026

Introduction to Data Science

Cisco Networking Academy | January 2026
