OLOWU ABRAHAM ADURAGBEMI

Data Analyst | Business Analysis | Quality Assurance & Data Validation | SQL & Power BI

Lagos, Nigeria | +234-916-036-6834 | olowu.tayo200@gmail.com

linkedin.com/in/eriioluwa | github.com/Ethminer001 | ethminer001.github.io

PROFESSIONAL SUMMARY

Analyst working across data analysis, business analysis and quality assurance: understanding what a business needs, validating that a solution actually meets it, and reporting the findings clearly. Has caught defects in already-approved releases, including one affecting 1 in 6 records, and built the dashboards and documentation that keep decisions evidence-based.

SKILLS

Business analysis: Requirements analysis, functional specification review, resolving requirement ambiguities, stakeholder reporting

Quality assurance & validation: Validating outputs against written specifications, acceptance and unit test verification, defect tracking, root-cause investigation, statistical process control

Data analysis & BI: SQL (PostgreSQL, MySQL), Python (Pandas, Scikit-learn, statsmodels), Power BI (DAX, Power Query), Tableau, Streamlit, Microsoft Fabric, Advanced Excel

Statistics: Hypothesis testing, regression (linear and logistic), odds ratios, A/B testing, confidence intervals

Communication: Clear, plain-language findings and recommendations for technical and non-technical stakeholders

PROFESSIONAL EXPERIENCE

Data and Validation Analyst

Stratum Core Systems, Lagos, Nigeria (Remote) | March 2026 - Present

- Review analytical releases against their approved specifications before sign-off, issuing go/no-go recommendations with the supporting evidence to the Founder
- Validated a six-revision calculation engine: reproduced 22 acceptance test vectors and 30 unit tests, added 9 independent cross-checks, and surfaced a 1,356-record discrepancy between two implementations
- Found a logic defect in an approved release: 24 of 144 records (1 in 6) passed the shipped logic but failed the documented rule
- Caught a denominator error that inflated exposure estimates by over 15,000%, holding the release until it was corrected
- Escalate requirement ambiguities to the product owner for a decision, and run defect and rerun control through version-controlled registers
- Report weekly to the Founder on progress, open defects and decisions required, in notes leadership can act on without a technical interpreter

Data Analytics Consultant (National Service)

Government Technical College, Osogbo, Nigeria | February 2025 - December 2025

- Designed a monitoring framework tracking 15 performance indicators to flag at-risk students early; class average rose 15%
- Built 3 regression models quantifying the effect of attendance on academic outcomes across 120+ records

Digital Community Growth Analyst

Freelance, Remote (United States) | January 2022 - March 2023

- Tracked engagement and participation across 71,500+ members in 2 online communities, producing weekly retention and engagement dashboards
- Ran 4 A/B experiments with significance testing; recommended changes lifted participation 25%

Quality Assurance Analyst

Archy Pharmaceutical Company, Lagos, Nigeria | June 2021 - October 2021

- Monitored 200+ batch tests via statistical process control charts, maintaining 100% GMP compliance
- Flagged 15+ out-of-spec patterns before escalation, cutting batch rework 20%

Inventory Analyst

Preplus Supermarket, Lagos, Nigeria | March 2020 - January 2021

- Built demand forecasting models across 500+ SKUs using time series analysis; stockouts dropped 30%, inventory turnover improved 15%

PROJECTS

Field Data Validation: 3,164 Community Records in North-East Nigeria

Python | Public UN IOM data | github.com/Ethminer001/nigeria-dtm-field-validation

- Ran ten rule checks on 3,164 field survey records from north-east Nigeria: 422 (13.3%) failed a hard check and 688 more a review check
- Found most hard flags come from the education section, with the highest share of flagged records in Adamawa (22.8%)
- Published a filterable register of 1,315 flags, with the code and limits, so others can check the work

Payment and Order Reconciliation: 99,441 Olist Orders

Python, SQL | Public Olist e-commerce data (Brazil) | github.com/Ethminer001/olist-payment-reconciliation

- Reconciled 99,441 Brazilian e-commerce orders across order, billing and payment tables: 98.07% matched to the cent, and 1,370 (1.38%) were flagged with a cause for each
- Traced 58 apparent underpayments to a billing fault in 3 sellers (freight copied from price), so the gap looks like a billing error, not missing money
- Flagged 1,231 cancelled orders that still show a payment (R$ 269,735.11) for a refund check

Health Facility Registry Audit: 46,146 Facilities

Python, SQL | Public GRID3 and Healthsites data | github.com/Ethminer001/nigeria-health-facility-registry-audit

- Audited Nigeria's national health facility registry (46,146 facilities): 786 (1.7%) had duplicate, format or location faults, each listed with its cause
- Traced 98.55% of "Unknown" operating statuses to two source feeds, showing where re-checking would close most of the gap
- Matched 7,253 community-mapped records to the registry by distance and name, and found 384 named facilities more than 250 m from any registry entry

Antenatal Care and Child Nutrition by State: Nigeria DHS 2018 and 2024

R, SQL | Public DHS Program survey data | github.com/Ethminer001/nigeria-anc-nutrition-by-state

- Analyzed antenatal care, iron supplementation and child stunting for 37 Nigerian states from official 2018 and 2024 survey data, in R and SQL
- Caught that a change in how the survey defines "skilled provider" made Adamawa look 49 points worse (83% to 34%) while total attendance was flat (86% to 84%), and compared attendance instead
- Found any antenatal care in Kebbi fell from 52.8% to 23.6%, a change well outside sampling error

The Last 40 Million: Financial Exclusion in Nigeria

Python, statsmodels, SciPy | EFInA 2023 national survey | github.com/Ethminer001/the-last-40-million

- Analyzed 26,930 Nigerian adults across six statistical modules; adults with no formal education had 34 times the odds of financial exclusion compared with university graduates (OR 34.15)
- Showed gender was not significant after controlling for education, income, sector and region (adjusted OR 0.94)
- Prepared the survey file (28,392 respondents, 1,613 variables) and published a 14-page report and live dashboard

Patient Retention: No-Show Prediction in Healthcare

Python, SQL, Random Forest, XGBoost, SMOTE | Public Kaggle data (Brazilian public health appointments) | github.com/Ethminer001/patient-retention-analysis

- Cleaned and validated 110,527 medical appointment records (62,299 patients) before modeling
- Built a stacking ensemble of Random Forest, Gradient Boosting and XGBoost scoring 0.84 test ROC-AUC at predicting no-shows
- Found no-show risk rises with longer waits, especially without SMS reminders, and modeled $2.37M in projected first-year revenue recovery

Pricing Structure of 71 Shopify Stores

Python | Public product catalogues, 22,956 products | github.com/Ethminer001/dtc-pricing-study

- Analyzed 22,956 products from 71 public Shopify catalogues to see how stores structure prices
- Found 63 of 71 stores use compare-at (before-discount) prices, and 60% of products end in a round number
- Published the code and a report, keeping store-level scores private

EDUCATION

Bachelor of Science, Biochemistry

Federal University Oye Ekiti (FUOYE), Ekiti, Nigeria | September 2018 - August 2024

CERTIFICATIONS

- Advanced Learning Algorithms | DeepLearning.AI / Stanford University (Coursera) | 2026
- Supervised Machine Learning: Regression and Classification | DeepLearning.AI / Stanford (Coursera) | 2026
- Understanding and Visualizing Data with Python | University of Michigan (Coursera) | 2026
- Data Analytics Job Simulation (Tableau, Excel, Forensic Analytics) | Deloitte via Forage | 2026
- Foundations of Business Intelligence | Google (Coursera) | 2026
- SQL and Relational Databases 101; Python 101 for Data Science | IBM (Cognitive Class) | 2026
- Introduction to Data Science | Cisco Networking Academy | 2026
